GI650 ABS T8^{SERIE} TOUCH SCREEN

QUALITY & TECHNOLOGY CROSS-SECTIONAL DESIGN

Giropes has developed a compact indicator with a touch screen and multiple functions for all types of distribution, food, chemical and logistics industries.

TOUCH
SCREEN

MULTI
LANGUAGE

CONFIGURABLE
TICKET

PROGRAMMABLE
INDICATORS

8-INCH SCREEN

High-speed response for interacting with any material.

The resistive screen means it can be used with gloves or other objects (e.g. pens), while achieving the same accuracy as your finger.

But the technology is designed to prevent buttons being pressed accidentally.

Its design means it can be adapted to all environments, providing resistance to potential impacts.

USABILITY AND COLOR CONTRAST

Our team of engineers and designers devised the different screens with the aim of providing the operator with an optimum experience so they can easily configure it to suit their work requirements.

In terms of clarity and colour contrast in the checkweigher mode, the indicator provides a highly visible checkweigher function with bright colours to highlight the target weight information.

COMMON FEATURES

ANALOGICAL & DIGITAL LOAD CELLS

GENERAL FEATURES

8" touch screen
Desktop version
Reclining wall support (optional)
ABS housing
IP54 / IP65 protection
Dimensions: 242(w) x 226(p) x 126(h)
Packaging dimensions 418 (w) x 300(d) x 146 (h)
Weight of packaging: 4,4 kg
Languages: English, French, Portuguese, Italian, Spanish and German
Digital keyboard: QWERTY, AZERTY, QWERTZ
Power supply: 100-240 V AC 50/60Hz
(designed so the customer can adapt it to 12V DC)
Battery option (UPS type for power failures)
Operating temperature: -10°C to 40°C.

COMMUNICATIONS

RS232 x 2
Ethernet
USB - for uploading/downloading data (FAT32) or keyboard (optional device)
Optional Wifi*
Optional Alibi Memory
Optional RS485

* Optional WiFi disables Ethernet.

GI650 ABS

For analogical load cells

TECHNICAL SPECIFICATIONS

ADC sigma-delta converter
Certified up to 10,000 e in single range and 2 x 10,000 e in multi range and multi interval
Class III and IIII
Minimum impedance 29 ohm
Maximum impedance 1200 ohm

AVAILABLE FIRMWARE

Totaliser - Logistics (standard)
Truck weighing (optional on request)

GI650D ABS

For digital load cells

TECHNICAL SPECIFICATIONS

Certified up to 10,000 e in single range and 2 x 10,000 e in multi range and multi interval.
Class III and IIII
Distance between indicator and weighbridge of up to 1200m
Connection to up to a max. 32 of digital load cell

AVAILABLE FIRMWARE

Truck weighing

GI650 T8 TOTALISER LOGISTICS SYSTEM

The importance of traceability with firmware dedicated to control and registration at different levels.

GIROPES
WEIGHING SOLUTIONS

» **BATCH MANAGEMENT**

Different batch functions (product - box - pallet)

» **CODE MANAGEMENT IN DATABASE**

Management of archive codes, a dossier of 2000 codes can be managed. This archive is used for managing 4 different types of codes in a spreadsheet (e.g. customer, material, source and destination). You can enter a specific name for each type.

» **MANAGEMENT OF FREE CODES**

Management of 4 free codes of up to 6 text characters that will not be stored in the database. You can enter a specific name for each type.

» **MANAGEMENT OF WEIGHTS**

From 5.400 to 9.200 weights can be stored.*

» **MANAGEMENT OF SAVED TARES**

» **MANAGEMENT OF PRODUCTS AND TARES**

» **MANAGEMENT OF CUSTOMERS AND SUPPLIER LISTS**

» **LABEL CONFIGURATION**

The firmware allows you to choose between three types of preconfigured tickets. Configure tickets from the device itself (header menu with configuration of header and foot).

*The storage capacity may change depending on the memory usage of the indicator.

BATCHES

LOGISTICS SYSTEM

Product traceability must be properly managed and recorded. This may be a legal obligation in some cases, such as with food or pharmaceutical products, but proper records and traceability, from the unit product and the boxes or packaging, to the batch and then the truck, is essential for control and distribution processes.

Dates:	2021/11/05 09:49:15

TRUCK WEIGHING SYSTEM

» **WEIGHING OPTION**

- » *First manual weighing.*
- » *Second manual weighing.*
- » *Weighing with manual tare.*
- » *Unique weight with saved tare by plate.*

» **MANAGEMENT OF VEHICLES IN TRANSIT**

You can manage both trucks in transit and weights saved in the memory.

» **CONFIGURABLE PRINTING LIST AND TICKETS**

Allows you to configure the tickets quickly, easily and intuitively. Through the graphic visual interface, you can select the desired fields and determine the configuration to be stored in the device for each type of ticket.

» **LABEL CONFIGURATION**

The firmware allows you to choose between three types of preconfigured tickets.

Configure tickets from the device itself (header menu with configuration of header and foot).

» **CODE MANAGEMENT IN DATABASE**

Management of archive codes, a dossier of 2000 codes can be managed. This archive is used for managing 4 different types of codes in a spreadsheet (e.g. customer, material, source and destination). You can enter a specific name for each type.

» **MANAGEMENT OF FREE CODES**

Management of 4 free codes of up to 6 text characters that will not be stored in the database. You can enter a specific name for each type.

» **MANAGEMENT OF WEIGHTS**

From 5.400 to 9.200 weights can be stored.*

» **PRINTING PRE-PRINTED TICKETS**

It allows the printing of tickets saved in the database.

» **MANAGEMENT OF SAVED TARES BY PLATE.**

» **TARE**

Entering tares manually. Weighing with saved tares.

All metrological configuration functions can be protected by a password.

IP54

TRUCK WEIGHING FIRMWARE
Standard

Digital system functions

- ✓ **Individual diagnoses** the status of each of the digital cells.
- ✓ **Indicates incidents and errors** for the group of cells, or for each one of the digital cells.
- ✓ **Distinction and definitive identification** by the unique serial number of each of the installed cells.
- ✓ **Control the internal calculations** of each of the cells in real time.
- ✓ **Control errors quickly**, whether due to malfunction or a wiring failure.
- ✓ **Replace or change a cell** without the need for on-site calibration.

GI650D Downloading data

EXPORT / IMPORT

Simple but optimised system for uploading and downloading data, which allows data to be downloaded as a CSV file and used in Excel.

You can modify and create data (e.g. products, tasks, descriptions, customers, suppliers, etc.) in line with the structure.

GIMANAGER PC software for GI6XX indicators

The GIManager software of the Giropes Solutions division is dedicated to the configuration and display for the GI6xx indicator series.

FOLDERS SYSTEM
for exported configurations and firmware backups

GIMANAGER

Functions

- » Search for indicators connected to a network or serial port
- » Download firmware updates
- » Management of basic configuration and firmware backups
- » Configuration of indicator parameters (general, metrological and communication)

Configuration

- » GI650D Device Configuration:
 - » Metrological parameters
 - » AD parameters
 - » Calibration parameters
 - » Communication setup
 - » Regional parameters
- » Folders system:
 - » For exported configurations and firmware backups
- » Software actualization:
 - » GIManager automatically detects updates and asks user to install them

Requirements

- » OS Win 8 or later
- » Processor: 1GHz
- » RAM memory: 2GB
- » Disk space: 10GB
