

GST1 PLUS

SYSTEM OF UNATTENDED ACCESS CONTROL

SMALL DIMENSIONS WITH
INTEGRATED RFID DISPLAY

GST1 PLUS

Weighing of vehicles on weighbridge scales

Self-service terminal for weighing trucks or other vehicles. Available in painted steel and stainless steel, it allows the truck driver to weigh without the presence of an operator, facilitating plant entrances and exits.

WEIGHING OF VEHICLES ON TRUCK SCALES

Facilitates unattended weighing of trucks and other large vehicles on weighbridges, allowing fully autonomous entry and exit for the driver.

CONFIGURATION OF FINISHES AND APPLICATIONS

The GST1 PLUS allows the installation of printer and intercom. In addition, there is a choice of two finishes: stainless steel and painted steel, giving rise to various configurations.

It can be adjusted to the driver's height or to the standard height of a person.

SPEED AND AUTONOMY

With RFID card display as standard. This identification system can be linked to an unlimited number of RFID cards, making the scale a stand-alone, easily accessible weighing system for fleets of drivers.

G2 AUTOMATIC

Fully automatic weighing without the need for operator interaction. Controls all devices and modules that interact with the weighing system.

GST1 plus

It allows us to automate the weighing control

What does the automation of the weighbridge by integrating management software bring us?

KEY POINTS

- Increasing operational efficiency
- Reduction of waiting times
- Reduction of operating costs
- Decrease in accidents, increase safety
- Reduction of human error
- We avoid fraud in weighing

RETURN ON INVESTMENT (ROI)

- Reduction of fines for overweight
- Stock control and movement

SOFTWARE PC, WEB & APP

With Gestruck2 you can quickly and efficiently record and process traffic on your weighbridges.

SOFTWARE PC, WEB & APP

Gesnet2 is the Giropes Solutions solution for the automation and management of truck scales in waste plants.

COMPLETE SOLUTION

Automate your weighbridge with the management software for PC, GESTRUCK or GESNET (for triage centers). It enables greater control of stock movements, reduction of waiting times and operating costs, automatic reporting and decision making based on objective and reliable data, among other solutions.

*They can be linked to the company's ERP.

Diversity of models

Depending on the needs of the solution, different combinations with printer or intercom are available. The terminal is also available in a painted or stainless steel version.

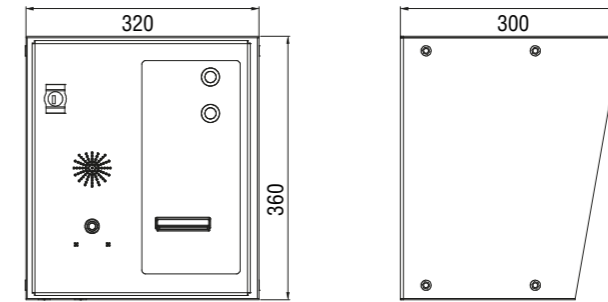

GST1 plus compact & resistant

Small in size, it includes a protective rain visor and corrosion-resistant finishes.

GST1 PLUS Serie

Discover the different configurations according to options. Available in stainless steel for more demanding environments.

GESTRUCK 2

software for truck scales

With GesTruck2 you can quickly and efficiently record and process the traffic on your weighbridge scales

The GESTRUCK2 software offers complete control of vehicle weighing operations with an interface that is easy to understand and, above all, helps to obtain the desired information as accurately and quickly as possible.

GST4

self-service terminal

**Autonomous station with touch screen
10.1"**

Self-service terminal that transforms weighbridge scales into automated weighing stations. It adapts to the access control needs of any sector thanks to the different associated software options and its complete range of accessories.

Availability of a complete range of accessories and complements: intercom, thermal printer, card display or 3G/4G communication among others.

GESNET

Software for the management of waste plants

Advanced weighing management and control solution designed to optimize processes in recycling centers

Allows the automation of entry and exit record, reducing waiting times. It facilitates the integration of weighing data with enterprise resource planning (ERP) systems, providing a complete and real-time view of operations.

**Gestruck2 programs can be completed with the installation of terminals. Require activation of this module for its control.*
