PROTECTION**

66 IP **GBOX8,** DESIGN & QUALITY

The new junction box, designed and manufactured by Giropes, makes it possible to have a weighing system that only uses components designed by Giropes. This guarantees that the weighing equipment will be of the highest quality and will operate perfectly.

The GBOX8 provides and receives signals from analog cells, stabilising data and ensuring maximum reliability for reading.

The PG9 cable glands are suitable for armoured cables. In conjunction with the design of the enclosure, they also provide IP66 protection.

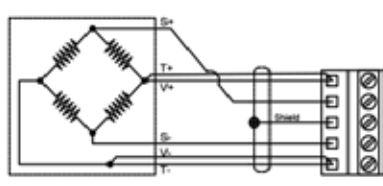

Dimensions in (mm)

Load cell 4 wire

Load cell 6 wire

| Reference | Description | Packing weight (g) | Code # |
|-----------|---|--------------------|--------|
| GBOX8 | Giropes hermetic ABS junction BOX (8 cells) | 320 | 240442 |
| AC8CLGBOX | Junction circuits up to 8 load cells | 96 | 240447 |
